OUR PORTFOLIO PROPERTIES

THE PROBLEM

What problem does The Last Frontier Collection solve?

01 Fragmented Booking Experience

Alaska visitors must navigate dozens of separate booking platforms for lodging, fishing guides, excursions, and transportation — leading to friction and drop-off.

02 Archaic & Outdated Websites

Many Kenai Peninsula operators rely on outdated web infrastructure, missing mobile bookings and failing to convert high-intent traffic.

03 Operators Not Responding

Lodge and excursion business owners frequently miss inquiries due to poor systems — guests book elsewhere or abandon plans entirely.

04 Daunting, Confusing Itineraries

Visitors face complex logistics — long drives, unclear routing, and no single source of curated, end-to-end trip planning for the Kenai.

Blakley Ct. Property — eliminate liability, increase equity

$150K — **Executive / Admin Hire**

Senior hire + holding costs, TC fees, capitalize LLC

$200K — **New Property Purchase**

Jellyfish Ave — strategic acquisition for inventory expansion

COMPETITIVE ADVANTAGE

Why The Last Frontier Collection vs. Traditional Alaska Operators

01 Vertical Integration

Own the full client journey — from first fishing inquiry to multi-night lodge stay and excursions. No competitor controls this full stack on the Kenai.

02 Established Local Presence

10 years of boots-on-the-ground operations in Cooper Landing. Deep relationships with local vendors, guides, and municipal partners.

03 Proven Top-of-Funnel

92,000+ annual website visitors to CLFG fishing alone. This owned audience is a durable, low-cost acquisition channel unavailable to new entrants.

04 Asset-Backed Returns

Investor capital secured by real estate equity. Returns backed by operating business income AND appreciating Kenai property values.

05 Fragmented Market = Opportunity

The Alaska small lodge market is highly fragmented with no dominant brand. First-mover advantage for a tech-forward, vertically integrated operator.

06 Scalable Acquisition Playbook

Phase 2 leverages the proven Phase 1 model to acquire underperforming properties using our client base as a ready-made revenue engine.

RISK MITIGATION

How we protect investor capital

RISK FACTOR	MITIGATION STRATEGY	SEVERITY
Seasonality Risk	Kenai fishing and lodging demand peaks May–September. Mitigated by multi-season programming (winter rentals, off-season group bookings) and lean fixed-cost structure.	Medium
Single-Market Concentration	Phase 2 expands to adjacent Kenai markets. Phase 1 uses diversified revenue streams (fishing + lodging + excursions) across multiple properties.	Medium
Key-Person Dependency	Phase 1 funds executive/admin hire explicitly to reduce founder dependency. Systems and operations being codified to support scale.	Low
Real Estate Value Decline	Kenai Peninsula property values supported by limited supply and increasing Alaska tourism trends. Properties also generate operating income independent of sale value.	Low
